Air shower :

For preventing interactive pollution, the air shower is required for the clean rooms system, located at the entrance of the clean room. It sprays clean air at a high speed (20~25m/s) to blow off the dust attached to the clothes and articles of the people entering the clean room.

1. Main blower : xHP 3-phase motor for main blower
   Wind speed rate : 20~25m/sec
2. Illumination : Fluorescent lamps 20W * 1 set
3. Door with closer : Aluminum interlock doors * 2 set (with monitor window)
4. Material : Painted steel plates 1.2t
5. Filteration : HEPA filter set (99.97%, 0.3μm)
6. Air nozzle : Adjustable #304 air nozzle jets × 16+ pcs

The dimension is according to the layout designed and the owner's need.
