|-------------------------------------|------------------------|
| ① UX:機種                             | Model                  |
| ② F:夾具90度旋轉<br>無                    | Wrist Rotation<br>None |
| ③ 30,60,150:適用成型機頭數 Vertical Stroke |                        |
| ④ V:真空吸著                            | Vacuum                 |
| ⑤ G:主臂加副臂                           | Twin Arm Type          |

## 系列特性 SERIES

### 快速換模調整設計

更換模具時，只需將萬向板手放鬆旋出機身，作業完畢之後再將機身旋回鎖緊即可

Ideal for fast and easy to change application

For mold changing, release the screw and turn arm out of main body. After change hold turn back and tie the screw

### 夾具模組化

- ★採用近接開關確認
- ★確認位置可調整

Molded fixture

- \* Magnetic sensor
- \* Adjustable sensor position

### 取出方向快速調整設計

取出方向(操作側或反操作側)的變更，只需17mm板手將螺母鬆開後，移動至適當位置後鎖緊即可，緊乙次即可完成迴轉角度50~90度

Easy to adjust direction for releasing object

\* To change direction of release object, the only operation is taking 17mm wrench to un-lock and lock again of screw of stroke. Various angle from 50-90 degree

### 電控箱(CD-EMI)採簡易操作設計

- ★動作程式的修改，只需3-5個鍵，即可完成
- ★動作時間多達15組，使得調整上更精細
- ★全自動運轉時變更，不需停機
- ★與成型機連線介面符合歐規(EUROMAP 12)及美規(SPI)

Controller(CD-EMI)

- \* To change parameters, only need key in 3-5 steps to complete inputting
- \* 15 timing modules, it is easy to complete more accurate adjustment
- \* Do not need to stop running machine when change any parameter
- \* Interface for injection meets EUROMAP12 and SPI
