

PATENTED

Construction

Single-impeller submersible pumps, with free-flow (vortex) impeller.
GQS: with vertical threaded delivery port (G 2").
GQV: with horizontal flanged and threaded delivery port (DN 50 - G 2").

Double mechanical shaft seal with interposed oil chamber, to protect against dry-running.

Applications

For domestic or industrial waste water, dirty water with solids up to 50 mm grain size, for liquids which are compatible with the pump materials.

For draining rooms or emptying tanks.

Extraction of water from ponds, streams or pits and for rainwater collection.

Operating conditions

Liquid temperature up to 35° C.

pH value: 6-11.

Maximum immersion depth: 5 m.

Minimum immersion depth: 275 mm.

Continuous duty (with submerged motor).

Motor

2-pole induction motor, 50 Hz (n = 2900 rpm).

GQV, GQS: three-phase 230 V ± 10%;

three-phase 400 V ± 10%;

Cable: H07RN-F, 4G1 mm², length 10 m, without plug.

GQVM, GQSM: single-phase 230 V ± 10%,

with float switch and thermal protector.

Incorporated capacitor.

Cable: H07RN-F, 3G1 mm², length 10 m, with

plug CEI-UNEL 47166.

Insulation class F.

Protection IP X8 (for continuous immersion)

Triple impregnation humidity-proof dry winding.

Constructed in accordance with: EN 60034-1;

EN 60335-1, EN 60335-2-41.

Materials

Component	Material
Pump casing	Cast iron GJL 200 EN 1561
Impeller	
Motor jacket	Chrome-nickel steel AISI 304
Jacket cover	
Casing cover	
Handle	Polypropylene (with frame in AISI 304)
Shaft	Chrome-nickel steel AISI 304
Mechanical seal: upper lower	Ceramic alumina/Carbon/NBR
Seal lubrication oil	Oil for food/pharmaceutical machinery

Other features on request

- Other voltages.
- Frequency 60 Hz (as per 60 Hz data sheet).
- Other mechanical seal.
- Cable length 20 m.

Characteristic curves n ≈ 2900 rpm

Performance n ≈ 2900 rpm

Pump with threaded ports: pipes screwed into the ports

Pump with threaded ports: pipes with union couplings (locally available)

Pump with DN 50 flanged ports: pipes with counter-flanges (locally available)

Features

Cable length 10 m, pump single-phase with plug

Easy inspection of the capacitor area.

Ring against accidental extraction of the cable.

Relief valve: the pump is fitted to a relief valve for air release around the impeller granting a proper pump priming also after long standstill periods.

Maximum flexibility of connection:

- Flange DN 50 PN 10 EN 1092-2
- N. 4 M8 holes on Ø 90 for duck foot coupling SA-G2"
- G 2" ISO 228

Pump casing with epoxy cataphoresis treatment joined to the external paint for a greater protection against the rust.

G 2 vertical, upward delivery port for installation in small pits, without the need for an elbow on the pump.

PATENTED

Handle in polypropylene, with frame in stainless steel.

Easy adjustment of the float switch: to allow the adjustment of start/stop pump levels.

The double shaft seal with oil chamber separates the motor from the water and provides further protection against accidental operation when dry.

Chamber with food/pharmaceutical machinery oil

Impeller with epoxy cataphoresis treatment for a greater protection against the rust.

Shaft in chrome-nickel stainless steel.

The free-flow impeller (vortex) construction is particularly suitable for liquids containing solids up to 50 mm grain size.
